PUMPING STATIONS

Viltra offer a comprehensive range of pump solutions to industrial, commercial and residential organisations.

Through a team of dedicated and skilled engineers, Viltra can provide design, consultation, assembly and servicing of pumping stations from small single house applications right through to large industrial and commercial installations.

Viltra have a proven track record of supplying cost effective pumping stations and pumping equipment within the waste water market. We provide high quality products and services tailor-made to our customers requirements, including fully comprehensive mechanical and electrical installation with technical support from design through to installation and final commissioning.

All our work is supported by a dedicated after sales service to give our customers complete peace of mind.
